a lightweight cybersecurity framework for thorough protection
Cyber threats to SMEs

Small and medium-sized enterprises (SME) are the new big target for cyber attacks. SMEs see themselves confronted with a large variety of cyber threats.

Solution: The SMESEC framework

SMESEC is a lightweight cybersecurity framework for protecting SMEs against cyber threats. As an SME, you find vulnerabilities and address them with simple tutorials, tools, and lessons-learned — all by yourself.
Benefits of using the SMESEC framework for your enterprise

Do it yourself
Step-by-step guidance for meeting customer requirements and standards

Keep the investment small
Cost-effective tutorials and tools suitable for a busy environment

Keep it simple
Practices adapted to your company instead of complicated formal policies and procedures

What SMEs are saying about SMESEC

“The SMESEC project is an enabler for small and medium companies to take back the control of their systems and infrastructure by the creation of a lightweight, easy to understand and exhaustively tested framework that will exponentially increase their security levels.”

Olmo Rayon

The SMESEC Consortium

SMESEC is a project proposed by an international group of experts as a response to the cybersecurity challenges of SMEs with a limited background on cybersecurity and a restricted budget. The SMESEC suite will be developed in 36 months by a strong consortium of 12 partners from 7 countries.
